

What the light bulb achieves for us

In the table, write down things you do — or that your family and friends do — that depend on light bulbs. Write what would have to happen if light bulbs had not been invented and what the disadvantages would be of the alternative solutions. Two examples are given to help you start.

ACTIVITY	WHAT WOULD HAPPEN WITHOUT A LIGHT BULB?	WHY IS THAT A DISADVANTAGE?
Reading in bed	Need to use a candle	Fire risk
Winter evening football matches	Cancelled or postponed until summer	

Design a poster showing all the things you can do because of a light bulb. Show as many different things as you can to show why we should celebrate the invention of the light bulb!
