

## The Twos Maths Challenge!

February is a unique month this year with the dates 2.2.22 and 22.2.22. These date patterns are quite unusual, therefore we wanted to mark the days (particularly as the 22.2.22 will be the last one following this pattern for this millennium!) by setting our Maths fluency homework linked to the number 2.

Choose from a selection of challenges on the menu to test your Maths skills. Everything involved in this challenge includes the number 2.

Start with any number, double it... and keep doubling! How high can you go?	Pay for something at the shops with only 2ps, 20ps and £2 coins.	How high can you count in 2s? How quickly can you do it?
How many 2s can you find in real world contexts (e.g. door numbers, signs, items in groups of 2). Be creative with what you can find and how you present it!	Write the 2 x times tables as high as you can go!	What quantities and items can you half during this week?

Please write in your fluency book which challenges you complete on each day!
